PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience building web applications using Python, Django, Flask, React.js, and SQL. Skilled in REST API development, database design, and responsive UI/UX. Proven ability to deliver full-stack projects end-to-end, from backend architecture to deployment.

SKILLS

Programming Languages: Python, JavaScript (ES6+), HTML, CSS

Frameworks & Libraries: Django, Django REST, Flask, React.js, Tailwind CSS, Bootstrap

Databases: MySQL, PostgreSQL, SQL

Tools & Platforms: Git, GitHub, VS Code, REST APIs, JSON

PROJECTS

Expense Tracker | *Python, Django, JavaScript, HTML, CSS, SQL* [Link to GitHub](#) [Link to Demo](#)

- Developed a full-stack expense tracking web application enabling users to add, edit, delete, and categorize income/expense transactions with real-time balance updates.
- Designed an intuitive UI/UX with category-wise filtering, date-based sorting, and search functionality for quick transaction lookup.
- **Integrated data visualization** using Chart.js/Recharts to display spending trends, category-wise breakdowns, and monthly comparisons.
- **Implemented budget-setting and alert features** that notify users when spending approaches or exceeds defined limits.
- Ensured fully responsive design, making the application functional across desktop and mobile devices.

E-Commerce Platform | *Python, Django, React.js, JavaScript, HTML, CSS, SQL* [Link to GitHub](#) [Demo](#)

- Developed a full-stack E-commerce platform with product listings, category filtering, search, and detailed product pages using **React.js** on the frontend and **Django** on the backend.
- **Built a shopping cart and wishlist system** with real-time price calculation, quantity updates, and persistent cart state across user sessions.
- **Designed an admin dashboard** for managing products, inventory, orders, and users, including CRUD operations and sales analytics.
- Implemented secure checkout flow and order management for a complete shopping experience.
- Ensured responsive, mobile-first design for a seamless shopping experience across devices.

CERTIFICATION

Fullstack Web Development - Tap Academy (2026)

- Completed an intensive program covering Python, Advanced Python, Django, Flask, and MySQL for backend development, along with core frontend technologies.
- Gained hands-on experience with Object-Oriented Programming, Multithreading, and Exception Handling in Python, and applied these skills across multiple full-stack projects, including a E - Commerce web - application covering database integration, REST API design, and responsive UI development.

EDUCATION

Bachelor of Computer Applications (BCA)
College of Computer Science and I.T, Latur

Apr 2022 – Jun 2025
CGPA - 7.9
